Trevor Youngquist 

www.trevoryoungquist.com 

I'm a software engineer specializing in Android/iOS mobile development and Python programming. I have 2 solid years of experience in backend development and mobile app development, along with some UI/UX design. Software development has never been "just a job" for me. It offers an engaging challenge to continually learn and improve my skills.

---

## Languages & Frameworks

- Python
- C#
- Javascript
- .NET
- Xamarin
- Django
- SQL (PostgreSQL, MySQL, SQLite)
- REST API

---

## Experience

### **Fox Phrase: A Word Party Game** ([On the Play Store](#))

An Android mobile game written in C# and .NET, using the Xamarin framework. This app also uses a Django REST API to send and save custom user decks and data via JSON. \*Coming soon to iOS!

### **Typist: An App for Social Media** (<https://github.com/ytrevor81/Typist>)

\*Coming soon to Android and iOS. Written in C# and .NET, using the Xamarin framework, create a message using a variety of vintage paper backgrounds and typewriter fonts, then post it on Instagram!

### **NFL Stats Library** (<https://github.com/ytrevor81/NFL-Stats-Library>)

A Django web app to browse the NFL stats of all players up until the 2018 NFL season. This app used a MySQL database and was deployed on a Linode VPS server. Website is no longer available.

### **AliExpress Web Scraping App** (<https://github.com/ytrevor81/Ali-Express-Web-Scraping-App>)

A Django web app that extracts and parses the HTML of an AliExpress.com product page. The user receives a CSV file of all product info from the page and can save their data in a PostgreSQL database.
