I'm a software engineer specializing in web development and Python programming. I have experience in back-end development, front-end development, and UI/UX design. Software development has never been "just a job" for me. It offers an engaging challenge to continually learn and improve my skills.

Languages & Frameworks

- Python
- Javascript
- HTML 5
- CSS 3

- Django
- Bootstrap CSS
- JQuery
- SQL (PostgreSQL, MySQL, SQLite)

Experience

Chris Stair Photography (https://www.chrisstairphotography.site)

A professional portfolio website for a travel photographer. This website was built from scratch, utilizing Bootstrap CSS, JQuery, and customized Javascript.

NFL Stats Library (http://nfl-stats-library.com/)

A Django web app that allows users to browse the NFL stats of all players up until the 2018 NFL season. This app uses a MySQL database and was deployed on a Linode VPS server.

AliExpress Web Scraping App (https://github.com/ytrevor81/Ali-Express-Web-Scraping-App)

A Django web app that extracts and parses the HTML of an AliExpress.com product page. The user receives a CSV file of all product info from the page and can save their data in a PostgreSQL database.

SQLite Database Browser (https://github.com/ytrevor81/DB-Editor)

A desktop app, made in PyQt5, that allows the user to create, upload, and edit SQLite databases. Written in Python, this app utilizes the Pandas library and navigates DB files via SQL queries.

Education

MARCH 2016

Political Science (B.S.) / Portland State University, Portland, Oregon, USA
